Rising gas prices can cost the average Missouri driver an additional $150 during the summer driving season. The Missouri Department of Natural Resources' "Saving Green on Gasoline" brochure has tips for saving on transportation fuel costs. Did you know that car maintenance like tune-ups and proper tire inflation can save car owners up to 10 percent in fuel costs? Or that one person switching from driving alone to riding the bus to work can reduce transportation costs up to $1,500 annually? For more tips, visit www.dnr.mo.gov/gasprices.htm and save green on gasoline!
