

Are you a Small Business Owner?

According to state and federal air regulations a small business

- employs 100 or fewer individuals;
- has small business concerns as defined in the Small Business Act;
- is not a major stationary source;
- does not release 50 tons or more per year of any regulated pollutant; and
- releases less than 75 tons per year of all regulated pollutants.

Are You Regulated by Air Quality Rules?

If your business operations release pollutants into the air, state and federal regulations may apply to you.

Air emissions from boilers, printing, finishing, spray paint booths, air conditioner servicing, vehicle repair, chemical processing/electroplating woodworking and much more generate air pollution that can be harmful to health and the environment.

It is important to understand and follow the regulations that protect the quality of our air. We can help.

Missouri Department of Natural Resources

Helping Small Businesses Protect Air Quality

Assistance Group

The Air Pollution Control Program's Assistance Group is a service of the Missouri Department of Natural Resources designed to help small businesses achieve compliance with state and federal air quality regulations.

The program's technical experts will help you understand

- the air quality rules and regulations that may apply to your business.
- how to complete a permit application.
- how to submit an Emissions Inventory Questionnaire.
- your rights and responsibility with regard to air quality rules and regulations.

The following services are provided:

- telephone consultation;
- on-site assistance;
- workshops/training; and
- educational presentations

Small Business Ombudsman

The Small Business Ombudsman acts as a liaison between the Air Pollution Control Program and small business owners and managers. The services provided by the Small Business Ombudsman include

- **Advising and assisting** small businesses regulated by air quality rules.
- **Recommending** to the Small Business Compliance Advisory Committee and the Missouri Air Conservation Commission appropriate changes in the rules.
- **Representing** small business concerns during air quality rule development.
- **Mediating** complaints or disputes about the administration of air regulations affecting small businesses.

Small Business Compliance Advisory Committee

The Small Business Compliance Advisory Committee is a seven-member committee that represents citizens, small businesses and governmental agencies. Per directive the committee addresses small business issues pertaining to air pollution, hazardous waste, solid waste and water pollution.

The services provided by the committee include

- **Receiving** reports from the Small Business Ombudsman.
- **Evaluating** impact of regulations on small businesses.
- **Assessing** impact of enforcement policies on small businesses.
- **Recommending** to the department, the Air Conservation Commission, and the General Assembly changes that would help small businesses comply with environmental laws and regulations.
- **Fact finding** consistent with the purposes of the small business technical assistance activity.
